Message from the Director

Ayushree Deshmukh

This venture is an amazing platform from where the inner voices are established to have their influence and impact felt. They direct paths, make life's journey purposeful and meaningful. Everything in life has a beautiful ending and if you find it not, then believe me it's not the end, it's just the beginning of something more beautiful. As mentors, tutors, instructors and parents, children are our prime accountability. The miracle of children is we do not know how and when they will change or who they will become. For this it becomes essential for each to have an understanding of child development so as to esteem, to value not only educational but cognitive, emotional, physical and social growth a child goes through. A number of child development theories have been proposed by numerous theorists and researchers. One such theory says that children can be thought of as 'little scientists' who actively construct their knowledge and understanding of the world.

Children have a very keen observation power and by observing people they learn new behaviours. It therefore is necessary to focus our attention on them. As elders and parents let us bequeath to children, not riches but the spirit of reverence, dedication and sincerity. No life ever grows up great unless it is focused, dedicated and disciplined. But no life is ever happy until it is lived for the glory of God which has to be inculcated in these citizens of tomorrow. As we are in the process of grooming them in the right path, let us bring them to a stand where the purpose of their life is to develop it and the meaning of their life is to give their gift away; when they can say" I can't change the direction of the wind, but I can adjust my sails to always reach my destination." They may be just a button's touch away, spilling out anxieties but will overcome it and come out with profound wonders. Remember a child's attitude towards everything is an artist's attitude. He will imagine, draw, sketch, portray and delineate. So how about building them?

"Every child is a different kind of flower and all
together make this world a beautiful garden"

From the Editor's Desk

Cecilia Reuben

Every human being is an artist in himself. This is the time for every artist in every genre to do what he or she does, loudly and consistently. We must keep asserting the complexity and originality of life. There is no time for anything else than the best that you've got. You are responsible for the kind of name you want to bear; you've got to create it and tag it to yourself. In whatever you do, you may look into it, ponder over it and finally find 'Oh! It's perfect'. But when you begin to reflect on it, stare it down, it will marinate in your soul over the hours, days and weeks, and you will locate flaws and find the need to continue enhancing it. The same is with our thoughts and ideas. It's high time we realize that not only children need to spend their time in study but every human being. Someone said 'Be a student so long as you still have something to learn and this will mean all your life'. Learning is not restricted to position or age. It is a treasure that follows it's owner everywhere. Anyone who stops learning is old whether at twenty or eighty.

Children are the world's most valuable resource and its best hope for the future. THEY are the trustees of posterity. Grooming them, nurturing them is a serious affair. We need to remember that there are no seven wonders in the eyes of a child, there are seven millions. Their paths therefore need to be piloted in the right direction so that what they learn today may someday light the world. There are two things that we should give them, one, roots to stand firm and the other wings to reach the zenith. It takes a big heart to shape little minds and to find a path to purpose. They need to be encouraged to fulfill their visions, face challenges so as to be well polished into brilliant gems and say:

When I was nobody you held my hand
to groom my way and make me stand.
You helped me to reason
even in the dry season.
You took a lot of pain
so that I could only gain.
I'm proud of what I am today,
so indebted is all I can say.

The Principal's Voice

Veena J. Ramball

INDO PUBLIC SCHOOL SENIOR SECONDARY SCHOOL has a proud history of academic achievement and is renowned for its ability to meet individual needs and fulfill potential. All students are encouraged to believe in themselves and their ability to succeed. We promote the achievement of excellence in a learning environment that is safe, caring and accepting diversity.

The School is committed to the development of lifelong learning skills that motivate and enable all students to make a positive contribution to society.

Learning is designed to develop understanding and to challenge students to push the boundaries of their thinking. The Students are encouraged to be creative, critical and caring thinkers. We want them to discover a passion for learning and life. We provide an environment that encourages students to be self disciplined, to learn from their mistakes, to be willing to take risks and to value their own and others thinking. Independent learning skills are developed within a technologically rich setting that includes collaborative, online learning environments.

Specialist teaching with broad, innovative ranges of subject choices ensure that each student's individual strengths are fostered. Our teachers work together to provide a holistic, integrated approach to student development focusing on key competencies for learning and life. We are proud of our inclusive environment which means that all students have an access to the curriculum with assistance and guidance.

We expect high standards of conduct, appearance and achievement.

The students of Indo Public School leave school as confident, well-rounded, independent young men/women who can follow their aspirations and make the most of their opportunities in life.

I am confident that INDO PUBLIC SCHOOL will always be a beacon of light guiding the destiny of its students, while radiating kindness and compassion as it soars high in its pursuit of academic excellence and fulfillment of the school motto 'FACTA NON VERBA' meaning facts alone and not the words, speak.

KEEP YOUR EYES UPON THE GOAL……SET GOALS

Dear Readers,

The school magazine gives me one more opportunity to share my opinion with you at mass. Its always been a pleasure interacting with the young bubbling inspiring minds. The tremendous energy they possess got me to think about ……GOALS!!!

KNOWLEDGE helps you to reach your destination provided you know what the destination is. Unless we focus, we cannot achieve our goals. It is hard to focus and concentrate, but it is a skill that can be learned. The story of Arjun and Guru Dronaacharya is one great example of focus and concentration. Arjun could hit the bird's eye only because he focused on his target.

It is rightly said, "On the journey to life's highway, keep your eyes upon the goal. Focus on the dot and not upon the hole."

On the best sunny day, the most powerful magnifying glass will not light paper if you keep moving the glass. But if you focus and hold it, the paper will light up. That is the power of concentration. In life, if you do not know where you want to go, then any road you take is not going to make a difference. Enthusiasm without direction is like wildfire and leads to frustration. Goals give us a sense of direction.

Do we ever sit in a train or board a plane without knowing where would it take us? The obvious answer is no. Then why do people go through life without having any goals? If most of the people are asked about their major objective in life, they would probably give a vague answer. Goals must be SMART i.e Smart, Measurable, Achievable, Realistic, and Time-bound.

Goals are often confused with dreams and wishes. Dreams and wishes are desires. They can be motivational in their approach but not the target. Desires become strong when they are supported by direction, dedication, determination, discipline and deadlines. That is what differentiates goals form desire.

Goals are dreams with deadlines and action plans. Goal is a passion that turns dreams into reality. Goals must be balanced with the six spokes of our life – Family, Physical health, Mental Health, Social life, Finance, and Spirituality. If any of these spokes are out of line life and goal go out of balance.

Goals lead to purpose in life. It is the starting point for all accomplishments. Aim for the moon. Even if you miss, you will become one of the stars.

"Obstacles are those frightful things you see when you take your eyes off your goal."

- Henry Ford.

Each one is born with a purpose to live. And that purpose may vary from person to person. An orchestra would be pretty dull if everyone played the same instrument with the same tune.

So, dear readers, do not fear failures ,shed away procrastination, raise your self-esteem and set your GOALS!

"Setting goals is the first step in turning the invisible into visible".

Wishing you a brighter vision and determination to set….GOALS and Achieve them!!!!!

Co-ordinator IK - I Speaks

Shireen Khan

The aim of education is knowledge, not of facts, but of values.

Thoughts from the heart, well- governed and shaped, help to plan and build the wonderful haven called the INDO KIDS KINDERGARTEN.

Each child and every teacher is our responsibility.

Work in this position involves planning, organizing and implementing along with the teacher-colleagues with an appropriate programme for the age group 2yrs to 5 years.

They say each child has made a leap from the crib to the classroom. While it takes time for each child to adjust in this transition period, the role of the teacher is multifold. Here is where we contribute to reshape curriculum, making it acceptable and meaningful. Today's little one comes with some learning experience and is all set for new learning.

Observations will then focus on how sociable a child is.

Therefore, we plan and provide a learning environment and offer experiences that promote physical, social, intellectual and emotional development.

If set goals are created, then children find it comfortable in meeting their goals.

Communication with the parent community, accepting the parents' inputs and trying out newer ideas are interesting challenges that are met with.

Records and reports from the classroom are mandatory to get closer to each child.

Periodic check on assessing the safe and healthy environment of each classroom. Playground safety is yet another area that needs a daily check.

Equipping the classroom with curriculum- based material/recreation -oriented equipment's /well defined interiors and ambience are primarily important. This can be handled with the support of the teachers who know the need of the hour.

Related duties are many in number and each one has to be performed well.

Before children go to school, they have been learning in a variety of environments - in their homes, in childcare and community settings. Children arrive at school with different backgrounds and experiences and at different stages of development. Positive early experiences with school are of paramount importance to young children. Children thrive within classrooms that meet their physical and developmental needs and that provide a secure, respectful, and nurturing environment.

Therefore, as mentioned earlier, each child and every teacher is responsible in the making of Indo Kids Kindergarten.

With thankful prayers to the Almighty I seek His grace.

The Supervisor IK - II says

Sushma Bhinwal

"Education ought to teach" us not only how to make a living but also how to live"

We at Indo kids Kindergarten are dedicated to the cause of imparting quality education.

Encouraging independence and responsibility is a key aim of our kindergarten class. Speaking about the teaching methods adopted for the children they are play based and activity based. We believe in learning with fun so we also follow a theme based and skill based curriculum. Education is based on more of activity and exposure in learning by doing method which brings out the best in children under no pressure at all.

We believe in giving freedom to all students and giving them a comfort zone to enjoy the environment. We teach phonetics through stories and rhymes and many other activities. We strength on physical and mental fitness through different activities in a slow and steady procedure.

During these years children learn better by seeing and doing which go beyond the play way method and exposes them to many concepts. The importance of Indo Kids Kindergarten education lies in the fact that the students become more confident, enthusiastic and eager learner who later on became successful in life.

"A new morning"

We welcome every morning with a smile, look on a new day as another special gift from our creator, another golden opportunity to complete what we were unable to finish yesterday. Be a self starter. We let our hour set the theme of success and positive action that is creation to echo through the entire day.

"Today will never happen again. So, it should not be wasted with a false start or no start at all. We were not born to fail".

" Discovery consists not in seeking new hands
but in seeing with new eyes"
